

Happy 2015 and a BIG thank you to everyone for your support since our opening last August! We wanted to Share with you all our **new referral program**: For every client who comes in for an exam on your recommendation or for every internet review you write (Facebook, Yelp, and Google), **you will have a \$10 credit added to your account in the hospital.** If you have referred a new client in 2014, you should be receiving a notice in the mail regarding how much will be waiting for you at your next visit. Thanks again!!

## February is Dental Month

We just got word about a sweet deal from our laboratory! For any anesthetic procedure this month\* (dentals, spays, neuters, mass removals), basic bloodwork is only

# \$50!

\*24-48 hours are required between blood draw and procedure for results.

Don't let it get THIS bad!

Six puppies joined us for our first Puppy Playtime on Saturday. Socialization in a safe environment helps puppies be more comfortable with other dogs and people. Puppy Playtime will continue for at least 3 more weeks on Saturdays at 10am. Give us a call for more details!

### Ever wonder what breeds may be in your dog?

A new blood test from Royal Canin can:

- Identify what breeds your dog descended from
- Screen your dog for 13 different genetic mutations that can predict specific health concerns.

The test is \$130 and can be done as a technician appointment. Results take about 6-8 weeks. Have all your family and friends try to guess what your pup descended from and see who is closest!

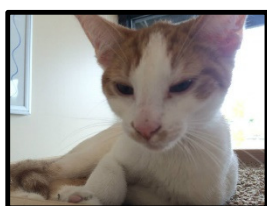

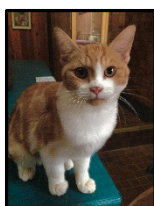

### Animal Community Talks will be featuring Dr. Rosie Gilbert as their February/March Speaker!

Topic: "Identifying and Managing Chronic Pain"  
Learn to recognize pain in animals and options for treatment, including laser therapy, NSAIDs, supplements, narcotics, acupuncture, and rehab. Discussion will cover management of injuries, dental disease, feline cystitis, arthritis, ruptured discs, and more.

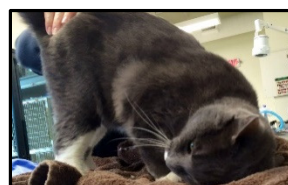

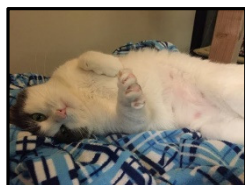

When: March 1<sup>st</sup> at 3pm

Where: The Community Room upstairs Dove Lewis Emergency Animal Hospital.

If you'd like to attend, please RSVP at [www.animalcommunity.org](http://www.animalcommunity.org)

Did you know we've helped find homes for 8 kitties and 1 dog through our adoption ward since opening in August? Congratulations to the new owners of Akasha, Pumpkin, Ravioli, Leo, Tellie, Sammy, Gala, Holly, and Wynter! Starting in 2015, all our Adoption Alumni qualify for 10% off veterinary services for the life of the pet. (Cannot be combined with other discounts).

## They're Heeeeeeeere!!

Parasite season is upon us! Without two weeks of temperatures below freezing, the fleas outside have not died off. We've continued to see fleas all winter, and they are only going to get worse. Our moist, warm climate is also perfect for intestinal worms. How do you decide which parasite preventative to choose? First answer some important questions:

- Do you currently have a flea infestation in your home?
- Do you prefer a medication you put on the skin or a chew?
- Does your pet have any allergies to fleas, flavorings, medications?

We have a number of options for parasite prevention, as well as some great specials. We'd be happy to help you decide what is best for your pet and your lifestyle!

### Current Parasite Prevention Specials:

Revolution (cats)-Buy 6, get 2 free. Buy 9, get 3 free.

Sentinel Spectrum (dogs)-\$15 rebate with a 6-pack, \$30 rebate with a 12-pack.

Nexgard (dogs)-Free dose with your first exam!

Don't forget! We now have punchcards for toenails & anal glands (**Scratch n' Scoot Cards**), as well as for **Class IV Laser Therapy treatments**. Laser therapy is helpful for arthritis pain, chronic ear infections, anal gland inflammation, post-op pain...pretty much anything except masses. Would your pet benefit from laser therapy? Feel free to ask us!
